ACADEMIC COUNCIL

During the Academic Year of 2023-24 a meeting of the Academic Council was held on October 10, 2024.

STATUS OF CONSTRUCTION OF SWiPS CAMPUS III:

The construction activities of Campus III have been suspended till the registration of the SWET under Sindh Trust Act 2020.

Solar Energy installations at SWiPS Buildings:

Karachi's ample sunlight throughout the year presents an excellent opportunity for utilizing solar energy to address rising electricity costs and ensure an uninterrupted power supply. By adopting solar energy, our institution aims to reduce dependency on fossil fuels, lower its carbon footprint, and contribute to a cleaner environment. Additionally, this transition aligns with our long-term goals of sustainability and energy independence while providing significant financial savings.

In light of these advantages, the management of Shahwilayat Educational Trust (SWET) decided to implement a solar energy system across its institutions. To oversee the project's review, finalization, and execution, the SWET Executive Committee (EC) constituted a dedicated committee comprising the following members:

1. Mr. Nasir Raza
2. Prof. Ghazanfar Hussain
3. Col. (R) Asghar Abbas

The committee meticulously reviewed proposals from leading solar energy providers. After thorough discussions, evaluations, and negotiations, the committee finalized the proposal submitted by M/S Wateen Energy Solutions. The project involved the installation of a 60 KVA solar energy system at each of the two SWiPS campuses.

The implementation timeline and milestones were as follows:

- **Campus I:** Grid connection was finalized on September 3, 2024.

- **Campus II:** Grid connection was finalized on September 20, 2024.

The installations have been completed, and power generation is now successfully operational at both campuses. The net metering process is underway and is expected to be finalized soon.

As of now, the total expenditure on the project amounts to:

- **Campus I:** PKR 10,156,483/-
- **Campus II:** PKR 9,602,620/-

We extend our heartfelt gratitude to the committee members for their vigilant efforts and dedication in ensuring the successful completion of this project. Special thanks go to the Managing Trustee, Mr. Ajaz Hasan Khan, for his invaluable guidance and personal involvement throughout the project.

The adoption of solar energy marks a significant milestone in SWET's journey towards sustainability and energy independence. This initiative not only addresses current electricity challenges but also reflects our institution's commitment to a greener future.

CAPITALIZATION & REPAIR & MAINTENANCE

Total addition to **Capital Assets** during 2023-24 amounted to PKR:6,456,493.
